TEPHRA / FALLOUT RECONSTRUCTION

Aso-4

87 measurements · stacked thinning · median surface

THICKNESS

Closed isopachs · cm

READING THE MAP

- Within data hull
- Extrapolated contour
- Data hull boundary
- Regional check
- Measurement
- Source reference

Closed contours follow the fitted surface. Dashed sections are extrapolated, not evidence of measured absence.

Unresolved at map limit: 0.1 cm. These curves have not been artificially closed.

Source-centred Lambert azimuthal equal-area projection · Coastlines: Natural Earth, public domain
